VOLUMEN 22 Número Extraordinario • 3^{er} IBAM CLL 2018

CONTENIDO

Palabras de bienvenida	
<i>Raimundo Fernando Bezares MD</i>	5
Autoridades	6
Programa	7
Overview of familial chronic lymphocytic leukaemia: The genetic susceptibility to chronic lymphocytic leukaemia and monoclonal B-cell lymphocytosis	
<i>Catovsky D</i>	9
The role of B-cell receptor and microenvironment signalling in chronic lymphocytic leukemia progression	
<i>Dighiero G</i>	15
Dueling selections for and against auto and foreign antigens in the evolution of CLL stereotyped subset #4	
<i>Chiorazzi N</i>	22
Mutations of TP53 in chronic lymphocytic leukemia. Clinical impact and methodological considerations	
<i>Hassan R, Torres DC, Stanganelli C, Lima L, Segges P, Ferrerira G, Emmel V, Vera-Lozada G, de Souza Fernandes T, Campos Lima M, Abdelhay E, Slavutsky I</i>	26
Unraveling CLL progression in unmutated patients: linking functional AID expression with disease evolution	
<i>Seija N, Sepulveda J, Prieto D, Morande P, Uriepero A, Navarrete M, Oppezzo P</i>	33
Abstracts	37
